

A global leader in AI-enabled software and services that empower customers to develop, deploy, and operate clean energy assets.

Stem offers a complete set of solutions that transform how solar, hybrid, and energy storage projects are developed, built, and operated, including an integrated suite of software and edge products, and full lifecycle services from a team of experienced industry experts.

Software + Edge Solutions

Stem provides a leading, proven portfolio of software applications and fully integrated edge devices for commercial and utility-scale clean energy assets.

Asset Management

PowerTrack™ APM

Maximize solar, BESS and hybrid asset performance with advanced monitoring, streamlined event management, and reporting.

Monitoring and Control

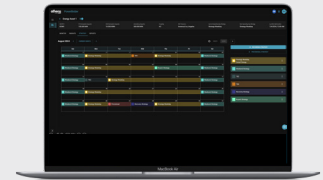

PowerTrack™ EMS

Integrate software, power plant control, and flexible configurations for any asset type with a seamless, edge-to-cloud platform.

PowerTrack™

Monitor, optimize, and control solar portfolios with Stem's flagship, hardware-agnostic platform.

Market Optimization

PowerBidder™ Pro

Take full control of merchant battery storage optimization with customizable automated bidding, real-time insights, and advanced analytics to maximize returns.

Energy Services

Stem's comprehensive suite of energy services supports all of your needs throughout the project lifecycle.

Development & Engineering

Feasibility & Preliminary Design
Revenue Modeling & Market Advisory
Development Design & Engineering
Owner's Engineering
Interconnection Application Support

Procurement & Integration

Procurement Strategy & Advisory
ESS Design & Integration
Turnkey BESS Procurement & Delivery

Performance & Operation

Trading Strategy Development
Managed Bid Optimization
Managed Scheduling
Managed Programs
Remote Operations Center (ROC)
Long Term Service Agreements (LTSA)
Performance Reporting

The Stem Difference

Best-in-class Software

Stem's proven software is in use with 16,000 customers and has been recognized as leading by third-party analyst firms.

Unparalleled Experience

Our ability to monetize clean energy assets across thousands of projects worldwide helps customers maximize project ROI under any conditions.

Full Lifecycle Support

Stem's breadth of energy service offerings, complete software suite and extensive industry experience ensure customers have a partner to tackle any challenge.

Customers Standardizing on Stem

Electric Cooperatives, Utilities, and Load-serving Entities

Across 40+ utility territories in North America, Stem offers seamless integration with utility programs and dispatch platforms, real-time operating visibility, and an unparalleled track record of success.

Developers, EPCs, and O&M Providers

We provide full lifecycle support to sell more projects, accelerate time to value, and maximize ROI.

Energy Traders, Asset Owners, IPPs, CCAs, and Offtakers

Stem enables visibility into the full economic performance of clean energy profiles with the ability to manage trading strategies and leverage our advanced automation and analytics.
